Description

1. **Disabling button**
   Files stored under Files tab can have nothing to do with project releases. In this case there must be a way to disable the "Download" button.
2. **External/custom URL**
   Redmine, for example, stores releases on external server. So there should be a way to specify external URL for "Download" button.
3. **Custom project name**
   If, for example, project name is too long there should be a way to specify an alternative shorter name.
