Description

Hello,

I have found that issue counter is not shown when issues grouped by some condition
See screenshot example.

After looking to view app/views/issues/_list.html.erb source code, I have changed one string and got issue count back:
from

```
<%= group.blank? ? 'None' : column_content(@query.group_by_column, issue) %> <span class="count">(
<%=  @issue_count_by_group[group_name] %>)</span>
```

to

```
<%= group.blank? ? 'None' : column_content(@query.group_by_column, issue) %> <span class="count">(
<%=  @issue_count_by_group[group] %>)</span>
```

As it done in vanilla issues list view

Could you please explain reason of changing 'group' to 'group name'? Probably I'm break something :)
Thanks

Tested on
Redmine 1.4.6 / Ruby 1.9.3-p327
Redmine 2.2.1 / Ruby 1.9.3-p362

See #2015. Will need to figure out why group.to_s does not work...
