Description

I tried your Extended Fields plugin, it is great helpful add link feature to custom fields.

But it seems in issues list, when certain link custom field is attached to the columns, the link does not display as normal.

Exp: #1928 has External issue with #9895 and System with http://www.redmine.org/, but anchor is not shown in http://projects.andriylesyuk.com/projects/redmine-fields/issues with two custom columns added on.

Best Regards,
V.E.O
