Target version:	0.2.0		
Redmine version:		**External issue:**	

Description

When migrating to Redmine 3.0.0-stable (GIT), the rake db:migrate RAILS_ENV=production command was throwing following error:

```
An error occurred while loading the routes definition of sidebar plugin (/opt/redmine/redmine/plug
ins/sidebar/config/routes.rb): You should not use the `match` method in your router without specif
ying an HTTP method.
If you want to expose your action to both GET and POST, add `via: [:get, :post]` option.
If you want to expose your action to GET, use `get` in the router:
  Instead of: match "controller#action"
  Do: get "controller#action".
```

Subsituting the “match” strings with “get”, as suggested by the error message, seems to solve the issue. Patch attached.
