Description I figured out that Redmine messenger is able to change status to "In progress" when user comes online (and task is active). Then when user leaves/goes away the messenger changes status to some different value (we can use "Paused" or whatever). Not sure how is it wanted but idea looks interesting... This way viewers will be able to check if anyone works on the issue right now...

- Status changed from Open to Incomplete

This issue looks very strange... Not sure how is this needed and who needs this. So setting "Incomplete" that is waiting for votes.
