Description

Currently Orangutan supports notifications only for the following objects:

1. New issues
2. Changes in issues (new journals)
3. New "watchers" (user added as a watcher)

Actually Redmine supports much more "objects":

1. Issue added
2. Issue updated
3. News added
4. Document added
5. File added
6. Message added
7. Wiki page added
8. Wiki page updated

So Orangutan should also support them!

Currently it is not a big problem because most of "objects" are disabled (no notifications about them by email)... But...
