Orangutan - Improvement #1233

Use first name and last name instead of (or in addition to?) Jabber ID

Description

Right now when Orangutan tells that some user have done something he uses login + domain (e.g. jabber.sjua).

This is useful if a receiver wishes to speak with the person which have made changes (a receiver knows person's Jabber ID). So maybe JID should be left untouched.

But if a person uses a nickname the first and last names would be very helpful too!..

P.S. A check should be added if login contains @... Otherwise we get something like user@domain@jabber...
