

## Orangutan::Redmine - Feature #1337

### Automatic time tracking

02 Dec 2010 17:07 - Andriy Lesyuk

<b>Status:</b>	Incomplete	<b>Start date:</b>	02 Dec 2010
<b>Priority:</b>	Minor	<b>Due date:</b>	
<b>Assignee:</b>	Andriy Lesyuk	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b> <b>Not sure if this is need but just an idea...</b>  Currently a "task" has the following components: <ul style="list-style-type: none"><li>• Start time</li><li>• End time</li><li>• Description</li><li>• Issue</li><li>• And/or project</li><li>• Activity</li></ul> <b>Let's review them...</b>  Activity, project and/or issue can be set default. Start time and end time can be fetched using Jabber statuses. The only description left - but Redmine does not require it. <b>So what if...</b>  Assuming that user has set default activity and project or issue. Oragutan can start a task automatically when user comes online, can stop it automatically when user goes away or offline. In this case Orangutan won't use description. <b>Whould such mode be helpful?</b>  The only requirement is that user should pay a special attention to status changes! That is switch offline or away when leaves and don't when working.  Of course, for this Orangutan should be switched to a special mode by a request like:  <code>Track my time automatically</code>   In addition, Orangutan can let user sepcify description... Actually it will work with no special changes - if user enters something and task exists Orangutan will ask if task should be renamed.			

### History

#### #1 - 01 Mar 2011 14:38 - Andriy Lesyuk

- Project changed from Orangutan to Orangutan::Redmine
- Category deleted (Core)

#### #2 - 03 Mar 2011 12:39 - Andriy Lesyuk

- Status changed from Open to Incomplete
