Orangutan::Redmine - Feature #1337

Automatic time tracking

02 Dec 2010 17:07 - Andriy Lesyuk

Status:	Incomplete	**Start date:**	02 Dec 2010
Priority:	Minor	**Due date:**	
Assignee:	Andriy Lesyuk	**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			

Description

Not sure if this is need but just an idea...

Currently a "task" has the following components:

- Start time
- End time
- Description
- Issue
- And/or project
- Activity

Let's review them...

Activity, project and/or issue can be set default. Start time and end time can be fetched using Jabber statuses. The only description left - but Redmine does not require it.

So what if...

Assuming that user has set default activity and project or issue. Oragutan can start a task automatically when user comes online, can stop it automatically when user goes away or offline. In this case Orangutan won't use description.

Whould such mode be helpful?

The only requirement is that user should pay a special attention to status changes! That is switch offline or away when leaves and don't when working.

Of course, for this Orangutan should be switched to a special mode by a request like:

```
Track my time automatically
```

In addition, Orangutan can let user sepcify description... Actually it will work with no special changes - if user enters something and task exists Orangutan will ask if task should be renamed.

History

#1 - 01 Mar 2011 14:38 - Andriy Lesyuk

- Project changed from Orangutan to Orangutan::Redmine

- Category deleted (Core)

#2 - 03 Mar 2011 12:39 - Andriy Lesyuk

- Status changed from Open to Incomplete
