Description

A special context is required for listing issues. By default the context should list only issues assigned to a user. Supported parameters can be project, tracker, category, status, assigned user, start date, due date, estimated hours, done percentage... The context should be able to recognize requests like:

```
Show bugs
Show feature requests
```

Where "bugs" and "feature requests" are tracker names.
Some other queries which should be supported:

```
What should I do next?
```
