Description

Check Orangutan on Redmine 1.1.0 (the recent at the moment of writing this issue). Fix Orangutan code if needed.

The following bugs can be related to Redmine 1.1.0 (reported by Martin):

1. that rake error Error: Duplicate entry '1-orangutan' for key 'unique_schema_migrations' is not good, pls. fix it and give me new version, I can't run rake now without to remove your plugin
2. If I am only member of group and that is assigned as developer to project I am receiving message "To track time for issue #206 you must be a member of Informa project!"
My guess is that Redmine 1.1.0 changed the way groups are added to members.
3. saving of jabber field ... it never comes to def jabber=(arg) in user_patch.rb, it comes to def self.included(base)

If not related move then to separate issues...
