

Orangutan - Enhancement #1618

Support subrequests in single request message

03 Feb 2011 13:13 - Andriy Lesyuk

Status:	Open	Start date:	03 Feb 2011
Priority:	Minor	Due date:	
Assignee:	Andriy Lesyuk	% Done:	0%
Category:	Core	Estimated time:	0.00 hour
Target version:	2.00		
Description <p>One of the limitations of Orangutan is that he makes currently a single change to Redmine. While in Redmine you can change several properties...</p> <p>Let me explain... Check this scenario:</p> <ol style="list-style-type: none">1. User tells "100% done", Orangutan saves this2. Orangutan asks if user wants to close the issue3. User agrees, Orangutan changes status + sets due date (in separate context) <p>What we will have? We will have three journals:</p> <ol style="list-style-type: none">1. Changed done ratio to 100%2. Changed status to Closed3. Changed due date to XX/XX/XXXX <p>The last two journals will have exactly the same date of creation!.. This can end up with many little journals!</p> <p>One of the possible solution is (when posting change) to "add" changes to the previous journal. But the issue with this solution are:</p> <ul style="list-style-type: none">• Some user will already get notifications about the journal without new change• The change date won't be accurate <p>So the another (and better) solution is:</p> <ul style="list-style-type: none">• Support subrequests in user messages like: <p>User: #1617 is 100% done, close #1617 and change due date to today</p> <p>This should be the same as:</p> <p>User: #1617 is 100% done User: Close #1617 User: Change due of #1617 date to today</p> <p>But this should only create a single journal.</p> <ul style="list-style-type: none">• Postpone commit to the end of message handling. <p>That is if some another context is changing something on some event in its event handler it will be added to the same journal.</p> <p>P.S. Subrequests can be of completely different types, e.g.:</p> <p>User: #1617 is Closed and I am free now</p>			

History

#1 - 03 Feb 2011 19:40 - Andriy Lesyuk

- Subject changed from *Support several subqueries in single message* to *Support subrequests in single request message*

#2 - 03 Mar 2011 13:09 - Andriy Lesyuk

- Tracker changed from *Feature* to *Enhancement*

#3 - 04 Mar 2011 00:13 - Andriy Lesyuk

Regarding second solution a special mode can be added, e.g.:

User: Going to make many changes to #562

Orangutan: Thanks for letting me know.

User: 50% done

...

User: That's it

Orangutan: Cool! Saving.
