### Invalid roadmap and version pages URLs

24 Mar 2011 23:09 - Andriy Lesyuk

<b>Target version:</b> 0.0.3	<b>External issue:</b>
<b>Redmine version:</b>	
<b>Description</b> A version can have an associated Wiki page. This page is shown (besides Wiki page view) on version page and on roadmap. Currently the plugin uses request.url to determine the URL. So for Wiki page view, version page and roadmap it uses current URL which is not correct for Roadmap. For version page and Wiki page it is correct.  Replacing request.url with url_for() (see <a href="#">#1683</a> ) would not solve the issue as in this case URL would not be correct for version page and roadmap.
