### Description

#### 1. Disabling button

Files stored under Files tab can have nothing to do with project releases. In this case there must be a way to disable the "Download" button.

#### 2. External/custom URL

[Redmine](#), for example, stores releases on external server. So there should be a way to specify external URL for "Download" button.

#### 3. Custom project name

If, for example, project name is too long there should be a way to specify an alternative shorter name.
