Description			
Hi,			
Thank you for this Plugin ^^			
However i have a little problem, it's work fine when a user create or modify her account, but it doesn't work when the profile is updated in Administration => Users (redmine/users/xx/edit), the table doesn't update			
it may because i have redmine 1.1.2 ? or it's normal plugin's operation ?			
Thank for help

I will investigate the issue... The plugin should work for user edit page as well so this is a bug. And, yes, it can be related to 1.1.2. Thanks!
