Description
It would be good if cdindex would detect more info about the media. For example - is cd multisession, does it have Joilet and Rock Risge extensions, how much sessions (tracks) etc.

Important data are also the vendor (and model?) of the media. These would help to find a lost media among untitled ones *(thus, I'm having such situation)*.

Other data of interest: a) is CD, DVD or BD? b) Size and c) R or RW? Maybe also +R or -R?
