Target version:	
Description Currently the syntax for cdindex is: <pre>\$ cdindex "The Wire, Season 1" /media/cdrom /dev/cdrom</pre> Should be something like: <pre>\$ cdindex -d /dev/cdrom -i /media/cdrom "The Wire, Season 1"</pre> <i>Note: The database name can be read from ISO9660 too.</i> Also the following environmental variables could be supported: <ul style="list-style-type: none">• CDINDEX_MOUNT_POINT• CDINDEX_DEVICE

The cdindex should also support options for plugins. These can be long options... For example, for video extractor:

```
$ cdindex --screens 10 "Transformers: Dark of the Moon"
```

#2 - 05 May 2011 10:26 - Andriy Lesyuk

CD-Index should support "update" mode. This can be full recreation and can be just partial update. For example, if new extractor for images is added to add CDP database one will do:

```
$ cdindex --update --extractors image "My Media CD"
```
