Description

Current ads form is not very friendly!.. Here are issues:

- One-level list of placeholders is hard to read
- It's not clear what placeholders already have ads and which don't (for Firefox corresponding options have "checked" icon which however do not work under e.g. Chrome)
- When HTML code is modified and one selects another placeholder the confirmation dialog appears... But the placeholder is no changed back if user rejects!..

I plan to change this form in the next version. Some ideas:

- To the left we can have "menu" like:
  - Content
    - All pages
    - Project page
    - ...
  - Sidebar
    - All pages
    - ...
- Some "tab" (or similar) can allow switching to "menu" like:
  - All pages
    - Content
    - Sidebar
    - ...
  - Project page
  - ...

Not sure where to place the outline for now...
