<b>Target version:</b>			
<b>Description</b> <p>Currently I have two projects which I'm going to "rename":</p> <ul style="list-style-type: none"><li>• <a href="#">Redmine SVN Creator</a> which is going to become "SCM Creator" (due to Git support).</li><li>• and <a href="#">Redmine Google Ads</a> which can be used to define HTML for hooks and going to be renamed too...</li></ul> <p>It's not a problem to change name but it's a problem to change project "identifier" used in URL!.. It's possible to change it using SQL but old links will become broken. Perhaps <a href="#">Project Removal</a> plugin could be used but in this case I would need to transfer issues, Wikis etc.</p> <p>So I'm thinking about writing another plugin letting to define project identifier aliases (this way allowing to "change" the identifier)...</p>			

### History

#### #1 - 29 Aug 2011 15:07 - Andriy Lesyuk

- Status changed from *Incomplete* to *Open*

Got to have something like this! Too many projects changed their basic ideas...

#### #2 - 21 Sep 2011 19:09 - Andriy Lesyuk

- Status changed from *Open* to *In Progress*

- Assignee set to *Andriy Lesyuk*

- % Done changed from *0* to *30*

Started!

#### #3 - 23 Sep 2011 23:02 - Andriy Lesyuk

- % Done changed from *30* to *80*

#### #4 - 24 Sep 2011 19:40 - Andriy Lesyuk

- Due date set to *24 Sep 2011*

- Status changed from *In Progress* to *Closed*

- % Done changed from *80* to *100*
