

SCM Creator (+Github) - Feature #1781

The .git addition should be optional

Description			
When using Redmine based authentication, there is no way to tell the plugin to create repositories without the .git extension. Make it optional could be cool.			
Thanks

Hi! Thanks for reporting!
Are you using auto_create?..

#2 - 09 Jun 2011 14:26 - Sim COU

Hi,

Yes, I do. I looked at the code and using auto_create or not doesn't change anything since the '.git' is hard coded. I patched it at home so it is added only if add_ext is true in scm.yml
I can give you my patch but I think it's not very pretty add perhaps it doesn't handle all cases

As you want

If you don't use auto_create you can just remove .git from input field - that's why I asked... Actually it's a good idea to add an option to disable/enable .git. Thanks!

This is too small change and I will perhaps use another name e.g. git_ext so not sure about the patch... Thanks anyway.

#4 - 14 Jun 2011 11:31 - Andriy Lesyuk

- Target version set to *0.2.0*

#5 - 14 Jun 2011 21:08 - Andriy Lesyuk

- Due date set to *14 Jun 2011*

- Status changed from Open to In Progress

- % Done changed from 0 to 100

Added git_ext... Usage:

```
production:  
  auto_create: false  
  deny_delete: true  
  git:  
    path: /var/lib/git  
    git: /usr/bin/git  
    options: --bare  
    git_ext: true
```
