Description I thought about creating another plugin for Twitter... But it will be complex to combine these plugins on a page then. So maybe I should add other buttons to this one? The following social sharing buttons can be added (of course, only some of existing): <ul style="list-style-type: none">• Twitter "Tweet" button• Google "+1" button (<i>announced?</i>)• Flattr button• ВКонтакте "Like" button Feel free to add other social sharing buttons suggestions in comments!..

- Status changed from Open to Incomplete

What about compatibility?..

If only Facebook is chosen the button can be wide?..

P.S. If so the plugin is to be renamed into something like "Social buttons".
