#### Description

Looks like for [Redmine Git integration](#) which can use only HTTP an additional command is needed... Without it server responds:

```
$ git clone http://redmine.host.com/git/project.git project.git
Cloning into project.git...
Username:
Password:
fatal: http://redmine.host.com/git/project.git/info/refs not found: did you run git update-server-
info on the server?
```

So it looks like the plugin should also do git update-server-info...

Perhaps another git option should be added e.g. update\_server\_info.

P.S. Any suggestions/explanation (of why is it needed) would be helpful...

#### History

##### #1 - 14 Jun 2011 11:31 - Andriy Lesyuk

- Target version set to 0.2.0

##### #2 - 14 Jun 2011 11:56 - Andriy Lesyuk
