Description

As far as most of the work with an issue is going to be done using Orangutan it would be very useful to be able to change issue status using some special context.

Some samples and ideas:

User: [#128](#) is **new**
User: **Resolve** [#128](#)
User: **Close** [#128](#)

In addition the context should be called when issue is changed to be 100% done (e.g.). Of course, it should ask for confirmation:

Orangutan: So should I change its status to "Closed"?
User: Yes
Orangutan: Ok.

Another suggestion:

If user adds hours to an issue and issue status is new Orangutan can ask:

Orangutan: Maybe I will change status to "In Progress"?

User: Sure
