This is visual only. There are no "boxes" - they are rendered around text. Can be fixed by adding additional space between lines but I'm not sure if this is a good workaround...

**#2 - 19 Sep 2011 07:19 - Andriy Lesyuk**

Looks like can be fixed with:

```
code {
    line-height: 18px;
}
```

Now sure how this affects other elements... Need to test.

Could you please check?

For Chrome seems it should be 20px

Where to put this? I am not fluent in CSS...

```
code {
      line-height: 18px;
}
```

There is 'code' in application.css and it is

```
code {
    padding: 1px 2px;
    -moz-border-radius: 2px;
    border-radius: 2px;
    -moz-box-shadow: 1px 1px 2px #b4b4b4;
    box-shadow: 1px 1px 2px #b4b4b4;
    background-color: #fff;
    border: 1px solid #b4b4b4;
}
```

Inside it?

It seems this is the solution. I tested on Windows XP SP3 + Firefox 6.0.2 and Internet Explorer 8.0
