### Description

There are indents space between heading in wiki table of content in default theme, but not happen in red-andy theme. Is that impossible to support indent ins wiki TOC?

#### 1. toc in default theme

The screenshot shows a Wiki page with a navigation bar (Overview, Activity, DMSF, News, Wiki, About, Settings) and a table of contents. The TOC items are: Heading 1, Heading 2-1, Heading 2-2, Heading 3-1, heading 3-2, heading 4-1, heading 3-3, heading 4-1, and New file. A red box highlights the TOC items, showing that sub-headings are indented. On the right, there are Wiki actions: Edit, Watch, Lock, Rename, Delete, History, and a sidebar with Start page, Index by title, and Index by date. At the bottom, it says 'Also available in: HTML | TXT'.
