Description

There should be a way to send email when an error occurs on site... It's too complicated to check logs all the time and it's very easy to miss some errors.

- Category set to Redmine plugin idea

Hm... Actually it can be an idea for a new plugin... Saying on exception Redmine writes it to database (special table). Then such errors are shown in administration panel. The :show action can also provide a reporting facility (if exception happened in plugin it can suggest sending it to plugin's author, if it happened in core - to Jean-Philippe).

- Status changed from Open to In Progress

- % Done changed from 0 to 40

Not a new idea:

- http://www.redmine.org/projects/redmine/wiki/PluginExceptionHandler
- https://github.com/edavis10/redmine-exception-handler-plugin

So just need to install this...
