Target version:			
Description			
Just an idea:			
I usually work on one of the projects... So on the website somewhere can be a status e.g. "Andriy is now working on Download " (where Download is a link). On the other hand if I don't work on any of the projects (e.g. freelancing) - "Andriy is now working on his other projects..."			
The status should be triggered manually (using e.g. Orangutan).
