By the way, we use a custom theme with gravatar icons

#2 - 13 Sep 2011 15:46 - Andriy Lesyuk

- Tracker changed from Patch to Support
- Subject changed from menu icon to Menu icon
- Assignee set to Andriy Lesyuk

These icons are defined in the theme...
I can help you if you tell me what theme is this.

We use a custom Theme, that overwrite the standard one for colors and fonts

Unfortunately, I can't include an icon in the plugin because it will be set for all themes...

So workaround can be:

Download the following icon: megaphone.png
http://www.iconfinder.com/icondetails/49375/16/advertisement_advertising_blog_megaphone_promote_icon
Or any other...

Put it into public/images and name e.g. advertisement.png

Add the following CSS to your custom CSS:

```
#top-menu a.advertisements {  
    background-image: url("../../images/advertisement.png");  
}
```

#5 - 13 Sep 2011 16:11 - Andriy Lesyuk

- Status changed from New to Open

#6 - 14 Sep 2011 08:57 - Pierluigi Soana

Take note that:

- image must be 16 x 16 pixel
- in the css file you must add

```
#top-menu a.advertisements {  
    background-position: 0% 40%;  
    background-repeat: no-repeat;  
    padding-left: 20px;  
    padding-top: 2px;  
    padding-bottom: 3px;  
}
```

```
#top-menu a.advertisements { background-image: url("../../images/advertisement.png"); }
```

Ready to fix this if anyone needs this! But need a theme names ("Classic" and?..)! Or an idea how to do this without theme name...

Currently the plugin supports only the Classic theme (but appropriate CSS rules can be easily changed in custom themes).
