Description			
Not sure if such plugin already exists but I would need the following macros:			
<ul style="list-style-type: none">• ...• ... (or note)• ...• {TODO}• {FIXME}• {NEW}• @<login>, @"<First Last>" (<i>mentions should be shown in user's profile</i>)• Smiles, e.g. :-) etc• {HOOK:call_this_hook} - can call a hook with specified name• ...(till:<date>)..., ...(since:<date>)..., ...(ifopen:<version>)... - conditions for content to be shown e.g. <(ifopen:0.2.0).warning>...</warning> (<i>syntax maybe changed</i>)• or (<i>instead of above</i>) a block like <till-date:<date>>, <till-version:<version>>• {wikipedia:Ruby} - link to Wikipedia• (!) - generates exclamation mark icon• (?) - generates question mark icon			
Besides some other macros can be added for other plugins, e.g.:			
<ul style="list-style-type: none">• {DOWNLOAD} - renders Download button• {SCM} - puts SCM access command (e.g. svn checkout http://...)			
<i>P.S. This list is going to be extended</i>

Some kind of tip, warning etc is supported by https://github.com/dseifert/redmine_wiki_notes... But I want it to be of "block" type e.g.:

```
<warning>
This is a normal content rendered as usual:
* List item
* Another list item
</warning>
```

<notice>...</notice>
<tip>...</tip>
```

or:

warning. ...
notice>. ...
tip(important). ...
```
