Description
Files do have download count. But many of the plugins are fetched mostly using SVN and there is no count!
It would be greate to have some count for repository checkouts as well...

It would be also cool to have something on sidebar showing how much changes were made in e.g. SVN comparing to the latest stable release...
Perhaps for this a new column revision should be added to versions.

Maybe Apache conf should be a kind of:

```
SetEnvIf SVN-ACTION checkout-or-export iscommit
CustomLog "|/usr/share/redmine/vendor/plugins/svn_checkout/bin/update-count.pl" "%{SVN-REPOS-NAME}e" env=iscom
mit
```
