

Download Button - Patch #1860

Download button Wiki/Textile macro

26 Sep 2011 10:58 - Andriy Lesyuk

Status:	Closed	Start date:	26 Sep 2011
Priority:	Normal	Due date:	28 Jan 2012
Assignee:	Andriy Lesyuk	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	0.0.3		
Redmine version:		External issue:	ChiliProject#816
<b>Description</b>			
Many times I wanted to put Download button in Wiki pages, news etc.			
So it would be nice to have a macro like {DOWNLOAD}...

Wow, I actually didn't notice this issue before... I just implemented this and wanted to share the patch with you.

The implementation for Redmine was actually quickly done, but the new Liquid layer in ChiliProject 3.0 gave me some troubles. However, here it is.

Use in Redmine/ChiliProject < 3.0 as follows: {{download\_button}}

Use in ChiliProject >= 3.0 as follows: {% download\_button %}

Additionally, each of these macros/tags can have additional attributes to slightly change the style and/or the attributes of the DownloadButton.

For example,

Redmine/ChiliProject 2.x

```
{{download_button(package=nifticlib, label=Get the NIfTI library for C!, include_version=false, width=200px, font_size=20px)}}
{{download_button(float=left, margin_right=10px)}}
```

ChiliProject 3.x:

```
{% download_button package=nifticlib, label=Get the NIfTI library for C!, include_version=false, width=200px, font_size=20px %}
{% download_button float=left, margin_right=10px %}
```

(optionally, the argument list can in this case be enclosed in either braces, double quotes, or single quotes)

You may consider renaming this macro/tag to !{{download}} if you prefer. I was just thinking download\_button clarifies that the macro/tag will only place a button there, but not perform a download action... on the other side, the name of the plugin is download. The decision is up to you.

BTW This macro/tag works also great with your sidebar content plugin. This way it is even better configurable for which views to render the download button in the sidebar. Further it can be accompanied by additional text/graphics...

- File 02-compatibility\_with\_chili\_project\_and\_addition\_of\_wiki\_macro\_or\_liquid\_tag\_for\_chili\_project\_3\_0.patch added

Here is a clean version of the patch with all unnecessary changes reverted which I made while I was trying to get the Liquid tag for ChiliProject 3.0 working... further, I reverted the bump of the version number here as well.

#3 - 05 Jan 2012 22:32 - Andreas Schuh

- File 03-compatibility\_with\_chili\_project\_and\_addition\_of\_wiki\_macro\_or\_liquid\_tag\_for\_chili\_project\_3\_0.patch added

Of course I yet found some bugs in the parsing of the macro arguments (shouldn't have just copied the function from Redmine). Played more with it now and am satisfied so far. I renamed the macro to `!{{download}}`, respectively, `{% download %}` now, by the way.

#4 - 06 Jan 2012 14:18 - Andriy Lesyuk

Wow! Thank you very much! Will include your changes in the next version!

#5 - 06 Jan 2012 14:19 - Andriy Lesyuk

- Target version set to 0.0.3

#6 - 09 Jan 2012 05:34 - Andreas Schuh

- File 04-compatibility\_with\_chili\_project\_and\_addition\_of\_wiki\_macro\_or\_liquid\_tag\_for\_chili\_project\_3\_0.patch added

I just noticed a minor mistake in the patch. I forgot to remove the obsolete code from `DownloadMacroHelper#extract_download_options()` which has been moved to `DownloadMacroHelper#to_container_style()` and `DownloadMacroHelper#to_button_style()`, respectively.

So here's the once more modified patch...
