Textile draft

01 Oct 2011 07:39 - Andriy Lesyuk

Status:	Incomplete	Start date:	01 Oct 2011
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:	Redmine plugin idea	Estimated time:	0.00 hour
Target version:			

Description

I know that there are some plugins for this...

I was thinking about saving what is previewed... That is: when a user clicks "Preview" the textile is saved to preview_drafts table with the URI path and user id. If something happens when a user comes to this URL again below textile area there will be link "Load from draft saved at Oct 1, 2011".

This way drafts will get supported for all textile areas...

When textile is saved (using this URI) a draft can be deleted (*not sure how to implement this*).
