SCM Creator (+Github) - Bug #1869

Copying of hooks dir doesn't work (for me)

Description

Im using Redmine 1.2.1 and here's my scm.jml:

production:

auto_create: false
deny_delete: false

svn:

path: /svnroot

svnadmin: /usr/bin/svnadmin
hooks: /path/to/svn-hooks

url: https://redmine.mysite.com/svn

Repos are created just fine under /svnroot but hooks from /path/to/svn-hooks are being copied to /svnroot/hooks directory (instead of /svnroot/<repo name>/hooks) and since this directory doesn't exist it throws out an error:

/bin/cp: cannot create regular file `/svnroot/hooks/': Is a directory

Associated revisions

Revision 44 - 22 Oct 2011 11:05 - Andriy Lesyuk

Fixed #1869 and #1879 (thanks Blaž Podržaj, Mike Hagedon and Clément Démoulins!)

History

#1 - 17 Oct 2011 18:17 - Mike Hagedon

I had the same problem, and I think this is a bug. Line 104 of lib/scm_repositories_controller_patch.rb reads

args << "#{path}/hooks/"

If you change it to

args << "#{repath}/hooks/"

hook copying should work. At least it did in my case!

#2 - 18 Oct 2011 08:53 - Blaž Podržaj

Thanx mate, it works!
