Description

Currently "Wiki text" does not contain toolbar... There are two reasons:

1. Not sure if it's possible to place two toolbars on a page (*did not check*);
2. The following:

There can be too small space for a toolbar... So not sure if it should be added. How do you think (just vote for this issue if you want toolbar)?

Maybe there will be some ideas (*e.g. how to make it smaller*)?

History

#1 - 28 Oct 2011 21:17 - Andriy Lesyuk

Code for adding toolbar:

```
case field_format.try(:edit_as)
when 'string', 'link'
  tag = text_field_tag(field_name, custom_value.value, :id => field_id, :class => field_class)
when 'text'
  tag = text_area_tag(field_name, custom_value.value, :id => field_id, :rows => 5, :class => 'wiki-edit',
:style => 'width: 90%;') +
    wikitoolbar_for(field_id)
else
  tag = custom_field_tag_without_extended(name, custom_value)
end
```
