Target version:			
Description			
Why not making Orangutan a full-featured Twitter client?			
I see the implementation so:			
<ul style="list-style-type: none">• A Twitter monkey (which can be self-written or third-party bot) responsible for getting updates;• Orangutan getting updates from Twitter monkey and able to tweet etc (either through the monkey or self).			
Features (in request samples):			
<ul style="list-style-type: none">• (After tweet gets shown): Retweet• (After tweet): Reply: ...• (After tweet): @author ... (<i>reply</i>)• (Catch all - tweet): ...• Do not shorten URLs!• (After tweet): My favourite!• (After coming online): The following tweets were received while you were busy: 1) ... 2) ...• (Catch all): @SomeOne ... (<i>mention if not after tweet else - reply</i>)
