<b>Description</b> Right now the plugin supports syntax like <code>[[redmine&gt;#9638]]</code> which forms a link to <a href="#">Redmine...</a>  Thinking also about allowing external Redmine/ChiliProject links... That is to allow syntax like: <ul style="list-style-type: none"><li>• <code>[[redmine[projects.andriylesyuk.com]&gt;#1906]]</code> which will generate a link to issue <a href="#">#1906</a> on another Redmine-powered site;</li><li>• <code>[[redmine[projects.andriylesyuk.com]&gt;wiking:Wiki]]</code> which will generate a link to external Wiki page on another Redmine-powered site.</li></ul> Not sure however how this feature is needed...
