Description

Tried to use akregator... Hate that there is no filtering! Besides akregator often crashes (man, I have not read RSS for a while).

Something in browser like Google Reader?.. Hate browser things!..

Maybe Orangutan?.. A RSS monkey could fetch feeds and send to user:

```
Orangutan: 2 new articles which match your createria:
...
You: Don't show feeds containing Windows next time...
Orangutan: Got it!
```

What do you think?..
