a code just like

#2 - 06 Jan 2012 10:34 - Andriy Lesyuk

Isn't it rendered after saving?

As I see CKEditor has its own smileys... I guess WikiNG won't work with CKEditor! I doubt usual Redmine Textile does...

The only Textile format that still works with CKEditor that I have tried is the Wiki link or Link formatting. Everything else was disabled as CKEditor handles all that.

Let me know what else you need and I will try and find it, I love wiking but I need CKEditor as the people who will be using the wiki are not good with textile.

Hi,Andriy Lesyuk

I will test it in these days, and I will report anything wrong what I found. Thanks.
