Description

Hi, Andrey,

First of all, you are doing an amazing job. Thank you very much. And my question:

How can I get a result like that by using custom field:

```
<a class="external" href="http://www.gnu.org/licenses/gpl-2.0.html">GNU General Public License (GPL) v2.0</a>
```

as same as in the page overview of this plugin. (License custom field)

I could not figure it out.

Hi, Ismail!

Very happy to communicate with you again! Thanks for your feedback! I greatly appreciate it!

It's called "[custom field template](#)"... License field is [customized by name](#). See [this Wiki page](#) for more details.

Regarding the License field here is its template `app/views/custom_values/list/_license.rhtml`:

```
<% case custom_field.value
  when 'GNU General Public License (GPL) v2.0' %>
  <%= link_to(h(custom_field.value), 'http://www.gnu.org/licenses/gpl-2.0.html', :class => 'external') %>
<% else %>
  <%= custom_field.value %>
<% end %>
```

Thank you, Andriy Same for me. It's very nice to talk with you again.

I've already checked the links that you mentioned. I've created “_license.rhtml” file and entered the code above but I can not figure it out yet. I uploaded the file, restart the redmine, migrated the db but I don't see a type named “license” in the Format combobox.

In the meantime, I've created a custom field named *License* and which type is *text* and entered the text below:

```
GNU General Public License (GPL) v2.0
```

(I can get the code you supplied a little bit) but It did not gave me anything. What am I missing?

Note the path `app/views/custom_values/list/_license.rhtml`.

Here:

- list is custom field type
- license is custom field name

So if you created *License* field of type *text* the path should be: `app/views/custom_values/text/_license.rhtml`

Also note that text type is displayed as “Long text” and “Text” is actually string type. So the path may be: `app/views/custom_values/string/_license.rhtml`.

Andriy Lesyuk wrote:

Note the path `app/views/custom_values/list/_license.rhtml`.

You mean that?

```
redmine/vendor/plugins/extended_fields/app/views/custom_values/list/_license.rhtml
```

#6 - 23 Jan 2012 15:40 - Andriy Lesyuk

Yes

#7 - 23 Jan 2012 15:42 - Ismail SEZEN

By the way, I checked out from svn repository and using latest revision.

#8 - 23 Jan 2012 15:44 - Andriy Lesyuk

_license.rhtml is not a part of Extended Fields it's my template for *License* field. It is in my AndriyLesyuk.com plugin (my Redmine customization). The Extended Profile plugin allows you to create such templates for your own fields.

Большое спасибо за ваше терпение, Андрей:)

I've got it right now. I did it exactly as you said and in the custom fields section, I chosen list type for format and entered GNU General Public License (GPL) v2.0 text for list element. Then, in the project settings section, I selected it, and voila!

Thank you again for your patience
