<b>Description</b>			
I think, in the install of <a href="#">this page</a>			
there must be second item like below:			
<ul style="list-style-type: none"><li>• Run: rake db:migrate:plugins RAILS_ENV=production</li></ul>			
I only could install the plugin by using that command.			
New fresh install, not upgrade!			
I didn't try to fix it myself that I'm not sure.

Yeah, you're right! Otherwise user needs to add profile fields manually... Thanks!
