<b>Description</b>			
<p>When developing this plugin I tried saving original URL a user subscribed from (<i>if not logged in</i>) to redirect to this URL when registration (or login) was completed... Tried saving the back URL to session. But session seems to be cleared on login (<i>need to confirm</i>).</p> <p>So I gave up!.. Actually I thought that in most cases this will be registration not login and after going through all the registration steps it won't be so important for a user to get back to original URL!..</p> <p><i>Currently after registration/login the plugin redirects to project's overview page...</i></p>
