

## Projects - Improvement #1990

### anti notificatin spam - fine grained mail distribution

26 Feb 2012 19:11 - c force

<b>Status:</b>	Incomplete	<b>Start date:</b>	26 Feb 2012
<b>Priority:</b>	Minor	<b>Due date:</b>	
<b>Assignee:</b>	Andriy Lesyuk	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b> Be able to be notified fine grained for every kind of event is really a needful feature, but there shall also be a feature to manage fine grained mails distribution E.g. <ul style="list-style-type: none"><li>• immediately (redmine default behaviour)</li><li>• every &lt;first,second, ...&gt; day at &lt;time&gt;</li><li>• after &lt;number&gt; events</li></ul> Also checkout the feature request beeing a merge of fine grained notification features and fine grained schedule of mails sending. <a href="http://www.redmine.org/issues/8241">http://www.redmine.org/issues/8241</a>			

#### History

##### #1 - 26 Feb 2012 20:47 - Andriy Lesyuk

- Status changed from New to Incomplete
- Priority changed from Normal to Minor
- External issue set to #8241

Thanks for the suggestion!

Subscription is a little bit different than watching (default Redmine notifications)... I see it as notifying about new objects! While watching allows to be notified about changes (you need to click "Watch"). There is also project notifications...

Mail distribution is completely another story! Subscription, watching and notifications deliver mail... Then something should make a queue from this mail. In other words it seems to be a separate plugin - not a part of subscription...

I'm not sure I will implement this (as I don't need it personally)... Anyway putting this issue into my [Projects](#) project. It contains some other plugin ideas...
