Description

Sometimes I need to highlight a part of a text... Not just with **bold** or similar – but with some color.

Inline `<warning />` etc renders block... So need some different syntax.

History

Next `%{color:red}word%` is red.

produces

Next **word** is red.

At least, "word" is red in my Redmine with WikiNG theme...
... while here ... it is red neither in preview... nor in normal view.
