Orangutan::Redmine - Feature #20

Let user specify what he did during a break

Description

Saying I'm working on something and suddenly my manager asks me to attend a meeting. Saying the meeting lasts for an hour. When I get back Orangutan asks me if he should record a break. That's fine! But it would be cool if I could answer something like: "Yes... I had a meeting with my manager.". And he would add this as a task.
