**Description**

I tried your Extended Fields plugin, it is great helpful add link feature to custom fields.

But it seems in issues list, when certain link custom field is attached to the columns, the link does not display as normal.

Exp: [#1928](#) has External issue with #9895 and System with <http://www.redmine.org/>, but anchor is not shown in <http://projects.andriylesyuk.com/projects/redmine-fields/issues> with two custom columns added on.

Best Regards,  
V.E.O
