<b>Description</b>			
From 3.0 version Chiliproject uses some different theming so the current Red-Andy Theme does not work.  I would ask for making it compatible.

Oh... I'm not sure it can be made compatible...

Too much changed in ChiliProject 3.x! Also I do not know about any theme compatible for Redmine and ChiliProject... I guess it should be just separate theme.

Before Chiliproject 3.x, Redmine and Chiliprojects were compatible. Since 3.x they are not,

Maybe the title for the issue was misleading but what I had in mind is doing this theme (colours, buttons) for the Chiliproject 3.x.

ChiliProject is no longer active, so closing this issue.
