#### Description

With the plugin installed grouping by custom field became broken. Screenshot attached:

#### Associated revisions

##### Revision 46 - 08 Jul 2012 09:19 - Andriy Lesyuk

Override fetch\_row\_values for extended fields (fixes #2023), added == for CustomValue and \_list.html.erb (fixes #2015), added Turkish translation (thanks Ismail Sezen)

- Status changed from New to Open

Thanks for reporting!

##### #2 - 26 Mar 2012 07:09 - Vitaly Klimov

Actually it seems that this bug is caused by Redmine core - when splitting issues by group (file `issues\_list.html.erb`) Redmine does not convert group names to string thus comparing two CustomValue objects in our case. So there are two solutions:

- one is to correct this in `_list.html.erb`
- second is convert returned value to string explicitly in `extended_query_custom_field_column.rb` - although i do not know if it would cause problems in logic
