

SCM Creator (+Github) - Bug #2017

SCM Creation on Windows

04 Apr 2012 15:11 - Sascha Voth

Status:	Closed	Start date:	04 Apr 2012
Priority:	Normal	Due date:	01 Jun 2012
Assignee:	Andriy Lesyuk	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	0.4.0	External issue:	
Redmine version:			

Description

Windows Server

Redmine 1.3.2

SCM Creator 0.3

scm.yml

production:

auto_create: false

deny_delete: false

svn:

path: E:\svn\managed_repositories

svnadmin: C:\Apache-Subversion-1.7.4\bin\svnadmin.exe

url: <http://mydomain.de/svn>

Getting some strange errors when using SCM Creator. When creating a Subversion repository in existing project, the automatically created URL is "file://E:/svn/managed_repositories/<p-id>". This should be "file:///E:/svn/managed_repositories/d-0006" I believe (three slashes). When accessing and trying to delete the repository, both commands fail. I tried to adapt subversion_creator.rb, but since I've zero experience in ruby, the results are quite disappointing.

Associated revisions

Replaced add_to_base(...) with add(:base, ...), worked on #2017

Revision 88 - 31 May 2012 09:43 - Andriy Lesyuk

Refactoring a little + debugs for #2017

Revision 89 - 01 Jun 2012 09:48 - Andriy Lesyuk

Clean up and debug for #2017

History

#1 - 04 Apr 2012 15:46 - Sascha Voth

I've changed all file:// to file:/// and cleaned up my repository database. Now, when setting deny delete to true, deletion of the project fails, creation works. When setting deny delete to false, everything seems to work, as intended.

#2 - 08 Apr 2012 22:54 - Andriy Lesyuk

- Status changed from New to Open

- Assignee set to Andriy Lesyuk

- Target version set to 0.4.0

Thank you for the report!

Now, when setting deny delete to true, deletion of the project fails, creation works. When setting deny delete to false, everything seems to work, as intended.

Seems to normal behaviour?..

#3 - 16 May 2012 07:07 - Sascha Voth

When following your description <http://projects.andriylesyuk.com/projects/scm-creator/wiki/Configuration> about the option deny_delete, it should not affect the deletion of the redmine project itself, but it does. When trying to delete a project with the DB entry "created_with_scm = 1" i get an error, and the deletion fails:

Internal error

An error occurred on the page you were trying to access.

If you continue to experience problems please contact your Redmine administrator for assistance.

If you are the Redmine administrator, check your log files for details about the error.

```

Normal?

#4 - 19 May 2012 10:49 - Andriy Lesyuk

Oh... For some reason I missed that it fails to delete project. Sorry!
No, it's not normal!

#5 - 25 May 2012 23:00 - Andriy Lesyuk

- Status changed from Open to In Progress
- % Done changed from 0 to 20

Made a fix for file:///... Could you please check?

#6 - 30 May 2012 11:56 - Andriy Lesyuk

- Target version deleted (0.4.0)

Should not be blocking.

#7 - 30 May 2012 12:14 - Sascha Voth

- File production_error.log added

Still getting errors. Steps i've done:

- create new project
- selecting create SVN
- project creation redirects to error page

but

- project is created
- svn is created
- svn can be accessed via "/redmine/projects/d-0009/repository"
- repo settings result in error page "/redmine/projects/d-0009/settings"

Attached a part of the production log.

Regards.

ps: Do you have a time schedule for the 2.* version of your plugin? Since i just start using redmine, i think of switching to 2.* soon.

#8 - 30 May 2012 12:29 - Andriy Lesyuk

- Target version set to 0.4.0

Thanks for update! Will check.

ps: Do you have a time schedule for the 2.* version of your plugin? Since i just start using redmine, i think of switching to 2.* soon.

If you use other plugins you should wait with switching to 2.x perhaps... SCM Creator from SVN should work fine under 2.x - I have already ported it (but not tested it well).

#9 - 31 May 2012 05:22 - Andriy Lesyuk

Could you please show me corresponding record from repositories database table?.. Need to know e.g. if root_url is not NULL.

#10 - 31 May 2012 06:51 - Sascha Voth

Andriy Lesyuk wrote:

Could you please show me corresponding record from repositories database table?.. Need to know e.g. if root_url is not NULL.

Took a look into before submitting, but forgot to mention it. Sorry.

```
select * from redmine.repositories;  
select * from redmine.projects;
```

repositories result

```
'31', '22', 'file:///E:/svn/managed_repositories/d-0009', '', 'file:///E:/svn/managed_repositories/d-0009', 'Subversion', NULL, NULL, NULL, '1'
```

projects result

```
'22', 'Hans Projekt Test', '', '0', NULL, '2012-05-30 10:30:10', '2012-05-30 10:30:10', 'd-0009', '1', '5', '6'
```

#11 - 31 May 2012 09:55 - Andriy Lesyuk

- % Done changed from 20 to 40

Please update from SVN and try loading settings again. Then show me what it wrote to logs.

#12 - 31 May 2012 11:35 - Sascha Voth

- File production.log added

Creation works fine. Deletion at least on Redmine level, but not in the file system (auto_create: true, deny_delete: false).

Very nice!

#13 - 31 May 2012 16:34 - Andriy Lesyuk

You mean deletion also works? But repo on file system was not deleted?.. I don't see any errors in logs...

#14 - 01 Jun 2012 07:41 - Sascha Voth

- File *production.log* added

Andriy Lesyuk wrote:

You mean deletion also works? But repo on file system was not deleted?.. I don't see any errors in logs...

Yes, deletion works, but repo stays on the file system. Missed to add it in the log. Attached you another one where I:

- Created a project with SVN repo
- Deleted the project with SVN repo via Admin>Projects

There was no error, and the database entries are correctly removed (repositories, projects). But the SVN repository is still in the filesystem.

I've tested also deleting not the project, but the repository via the settings panel, which also gave no error in the production log. Should this throw one?

#15 - 01 Jun 2012 09:49 - Andriy Lesyuk

Hm... Added more debugs - could you please try again?

#16 - 01 Jun 2012 13:54 - Andriy Lesyuk

Anyway not working deletion is a different issue... Not related to this one! I figured out that I reproduce it too...

So closing this issue as fixed! Thanks, [Sascha](#)!

#17 - 01 Jun 2012 13:54 - Andriy Lesyuk

- Due date set to 01 Jun 2012
- Status changed from *In Progress* to *Closed*
- % Done changed from 40 to 100

#18 - 03 Jun 2012 21:24 - Andriy Lesyuk

http://www.ruby-doc.org/stdlib-1.9.3/libdoc/fileutils/rdoc/FileUtils.html#method-c-remove_entry_secure

In my case it was the parent directory which was everyone writable...
