OpenID Fix - Bug #2045

Manual account registration vs automatic openid registration.

Description

Hello,
I would like warn you that your fix doesn't follow original approvement of account as here

```
case Setting.self_registration
when '1'
    register_by_email_activation(user) do
        onthefly_creation_failed(user)
    end
when '3'
    register_automatically(user) do
        onthefly_creation_failed(user)
    end
else
    register_manually_by_administrator(user) do
        onthefly_creation_failed(user)
    end
end
```

but you instead changed default behavior that it automatically accepts the account,

```
case Setting.self_registration
when '2'
    register_manually_by_administrator(user) do
        onthefly_creation_failed(user)
    end
else
    register_automatically(user) do
        onthefly_creation_failed(user)
    end
end
```

which leads in future upgrades (for example they change self_registration code for manual approvement to something different than 2) to possibility of future exploit (it will automatically gives access to redmine).

By my opinion default behavior should be manual acceptance by administrator.

Associated revisions

Revision 7 - 07 Feb 2013 10:20 - Andriy Lesyuk

Added self-registration configuration, restored the registration behavior (#2045)
