SCM Creator (+Github) - Feature #2053

Set repository path according to identifier when using multiple repositories

15 Jun 2012 18:14 - Lluís -

Status:	Open		Start date:	15 Jun 2012

Target version:				
External issue:				

Description				
It would be nice if changing the *Identifier* in the *New repository* page would also automatically update the *URL* field instead of simply showing *<projectname>.<number>*.

History

#1 - 15 Jun 2012 21:27 - Andriy Lesyuk

- Status changed from New to Open

- Assignee set to Andriy Lesyuk

#2 - 20 Jun 2012 00:08 - Lluís -

I haven't tried redmine without your plugin, so *maybe* it's something that should be fixed in redmine and not here.

#3 - 20 Jun 2012 09:08 - Andriy Lesyuk

There are some notes regarding the issue... Value of URL should not be changed if:

- It was changed manually before (it should listen to onchange event);
- SCM Creator is not enabled for this SCM;
- URL is disabled.

#4 - 09 Jan 2015 18:34 - Lluís -

- File identifier-check.patch added

The attached patch ensures that the repository identifier and the repository patch match, ensuring Redmine's repository lookup will work; "/path/<proj.identifier>" for repositories without identifier, and "/path/<proj.identifier>.<repo.identifier>" for repositories with an identifier (sub-repositories in Redmine's parlance).
